

Sustainable Banking – The Greening of Finance

JJ Bouma, MHA Jeucken and L Klinkers (eds.)

Contents

Forewords

Hans N.J. Smits, Chairman of the Executive Board, Rabobank Nederland
Preben Soerensen, Global Director, Environment and Sustainability, Deloitte & Touche

Introduction

Jan Jaap Bouma, Erasmus University, Netherlands, Marcel Jeucken, Rabobank, Netherlands,
and Leon Klinkers, Deloitte & Touche, Netherlands

1. The changing environment of banks

Marcel Jeucken, Rabobank, Netherlands, and Jan Jaap Bouma, Erasmus University,
Netherlands

- 1.1 The role of banks
- 1.2 The environmental impacts of banking
 - 1.2.1 Internal
 - 1.2.2 External
- 1.3 Driving forces to take action
- 1.4 Actions taken by banks
- 1.5 The role of governments in sustainable banking
- 1.6 The dynamic and changing role of banks

Part 1: The Environmental Policies of Banks

2. Sustainable banking at UBS

Heinrich Hugenschmidt, UBS AG, Switzerland, Josef Janssen, Institute for Economy and the
Environment, University of St Gallen, Switzerland, and Yann Kermodé and Inge Schumacher,
UBS AG, Switzerland

- 2.1 Investment banking: environment demands a long-term perspective
 - 2.1.1 Environmental risk management processes in investment banking
 - 2.1.2 What are the benefits?
- 2.2 Environmental opportunities in asset management
 - 2.2.1 Efficient use of resources leads to economic and environmental benefits
 - 2.2.2 The screening and evaluation process
 - 2.2.3 The plausibility check: external analysis adds social corporate responsibility criteria
 - 2.2.4 Broad diversification by sector and country generates attractive results
 - 2.2.5 Eco Performance portfolios are attracting increasing attention
- 2.3 Future trends in banking: the Kyoto Protocol
 - 2.3.1 The Kyoto Mechanisms
 - 2.3.2 How will this affect the financial sector?
 - 2.3.3 Remaining challenges
- 2.4 Conclusion

3. A green package to promote environmental management systems among SMEs

Davide Dal Maso, Avanzi, Italy, and Carlo Marini and Paola Perin, Unicredito Italiano

3.1 The launch of 'Project Environment'

3.1.1 The analysis phase

3.2 Operation 'EMS Certification'

3.3 Future developments

3.4 Conclusions: a new role for the bank

4. Sustainable banking and the ASN Bank

Michel Negenman, ASN Bank, Netherlands

4.1 A brief history of ASN Bank

4.2 Ethical assessment

4.3 Our (speciality) products

4.4 The role of ASN Bank in a sustainable banking sector

4.5 The role of ASN Bank in the future

5. Assessing the sustainability of bank service channels: the case of The Co-operative Bank

Penny Street and Philip E. Monaghan, National Centre for Business and Sustainability, Manchester, UK

5.1 The Co-operative Bank partnership approach

5.2 Background to the service channel project

5.3 The Bank's service channels

5.3.1 Characteristics of service channels

5.4 Ecological and social impacts of service channels

5.5 Selection of ecological and social indicators

5.6 Summary of impacts and final set of indicators

5.6.1 Construction, maintenance and location of premises

5.6.2 Information and communication technologies (ICT)

5.6.3 Energy

5.6.4 Transport

5.6.5 Paper use

5.6.6 Use of plastic cards

5.6.7 Financial inclusion

5.6.8 Convenience and quality of service

5.6.9 Personal contact

5.6.10 Security and rights of privacy

5.6.11 Job security

5.6.12 Working conditions

5.6.13 Local economic development

5.6.14 Sound sourcing

5.6.15 Co-operative movement inclusion

5.7 Next steps

5.8 Conclusion

6. Grameen Shakti: financing renewable energy in Bangladesh

Firoze A. Siddiqui and Peter Newman, Murdoch University, Perth, Australia

6.1 Why does Grameen Shakti focus on renewables?

6.2 How does Grameen Shakti achieve its goals?

6.2.1 Programmes

6.2.2 Financial credit policies

- 6.3 The programmes: progress to date
 - 6.3.1 Solar home systems programme
 - 6.3.2 Wind power programme
 - 6.3.3 Hydro power programme
 - 6.3.4 Biodigester programme
 - 6.3.5 R&D and technology transfer programme
 - 6.3.6 Training programme
- 6.4 Conclusion

7. Assessing the 'triple bottom line': social and environmental practices in the European banking sector

James Giuseppe, Henderson Global Investors, UK

- 7.1 'Best-in-class' banks
- 7.2 The model bank
- 7.3 Environment
 - 7.3.1 Sustainable banking
 - 7.3.2 Good housekeeping
- 7.4 Overseas operations
 - 7.4.1 Human rights
 - 7.4.2 Burma
 - 7.4.3 Third world debt
- 7.5 Community involvement
 - 7.5.1 Access to banking
 - 7.5.2 Charitable giving and community involvement programmes
- 7.6 Business practices
 - 7.6.1 Disclosure in general
 - 7.6.2 Money laundering versus secrecy laws
- 7.7 Disclosure case study: retrospective liabilities
 - 7.7.1 The role of European banks in their dealings with the Nazis
 - 7.7.2 Summary of case study
- 7.8 Conclusion

8. Sustainable banking in Austria

Christine Jasch, Institute for Environmental Management and Economics (IOeW), Austria

- 8.1 Austria's route to sustainable banking
 - 8.1.1 Kommunalkredit AG
 - 8.1.2 Raiffeisen Landesbank Wien (RLB)
 - 8.1.3 Oesterreichische Nationalbank (OeNB)
- 8.2 Conclusion

9. Environmental attitudes of banks and financial institutions

Judit Barta, GKI Economic Research Co., Hungary, and Vilma Eri, Centre for Environmental Studies, Hungary

- 9.1 Financial institutions and the environment
- 9.2 The banks' impact on environmental performance of businesses
- 9.3 Conclusion

10. Banks and environmental practices in Bangkok Metropolitan Region: the need for change

Willi Zimmermann and Beatriz Mayer, Asian Institute of Technology, Thailand

- 10.1 The survey
 - 10.1.1 Environmental management in Thai banks
 - 10.1.2 Environmental credit risk assessments
 - 10.1.3 Green products and services
- 10.2 A lack of environmental drivers
- 10.3 The changing scenario
- 10.4 Conclusion

Part 2: Transparency and Communication

11. Reporting on the environment: current practice in the financial services sector

Kaisa Tarna, KPMG, Finland

- 11.1 Introduction
 - 11.1.1 Reporting guidelines
 - 11.1.2 Scope and method of the study
- 11.2 Why report and to whom?
 - 11.2.1 Communicating with stakeholders
 - 11.2.2 Target groups
- 11.3 Reporting practices: issues reported and forms of reporting
 - 11.3.1 General information
 - 11.3.2 Environmental management
 - 11.3.3 Operating ecology
 - 11.3.4 Product ecology
 - 11.3.5 Financial management
 - 11.3.6 Stakeholder management
- 11.4 Conclusions and future trends

12. Making the link between environmental performance and shareholder value: the metrics of eco-efficiency

Bjorn Stigson, President, World Business Council for Sustainable Development, Switzerland

- 12.1 Banks look beyond liability to opportunity
 - 12.1.1 Growing economies sustainably
 - 12.1.2 Measuring eco-efficiency
 - 12.1.3 Pilot programme
 - 12.1.4 Cross-comparable indicators
 - 12.1.5 Sustainability as an 'investable' concept

13. Transparency and the green investment market

Walter Kahlenborn, Ecologic, Germany

- 13.1 A definition of 'green investment'
- 13.2 The ecological usefulness of green investment
- 13.3 Green investment: the size and development of the market
 - 13.3.1 Market development up to the present
 - 13.3.2 Future development in the market
- 13.4 Transparency and visibility

- 13.4.1 Market visibility
- 13.4.2 Market transparency and the 'claim' of being green
- 13.5 Instruments to convey information on investments
- 13.6 Labelling
- 13.7 Conclusion

14. The corporate environmental performance-financial performance link: implications for ethical investments

Celine Louche, Erasmus University, Netherlands

- 14.1 The environmental-financial link: the theory
- 14.2 The environmental-financial link: empirical analysis
 - 14.2.1 Data and methodology
 - 14.2.2 Findings
 - 14.2.3 Pitfalls in assessing corporate environmental performance
 - 14.2.4 Case study: Triodos Added Value Investment Fund
- 14.3 Conclusion

Annexe 1: Empirical analysis

Annexe 2: Triodos Added Value portfolio

Part 3: Sustainable Investment Funds

15. Sustainable development funds: progress since the 1970s

Stefan Schaltegger, University of Lueneburg, Germany, and Frank Figge, University of Lueneburg, Germany/Pictet & Cie., Switzerland

- 15.1 Why are investors relevant for sustainable development?
- 15.2 Sustainable investment: the banks' perspective
 - 15.2.1 Investment procedures and products in an opportunity-threat scenario
 - 15.2.2 Historical development of sustainable investment products
 - 15.2.3 Product differentiation and integration into general policy
- 15.3 Outlook

16. The transition from environmental funds to sustainable investment: the practical application of sustainability criteria in investment products

Andreas Knoerzer, Bank Sarasin & Co., Switzerland

- 16.1 Development of environmental funds
 - 16.1.1 Volume trends
 - 16.1.2 Performance trends
 - 16.1.3 Summary
- 16.2 Transition from environmental to sustainable investments
 - 16.2.1 The underlying concept
 - 16.2.2 Sarasin environmental assessment
 - 16.2.3 Sarasin social assessment
 - 16.2.4 Analysis steps
 - 16.2.5 Conclusion
- 16.3 Outlook

17. The Dow Jones Sustainability Group Index: the first worldwide sustainability index

Alois Flatz, Lena Serck-Hanssen and Erica Tucker-Bassin, SAM Sustainability Group, Switzerland

- 17.1 What is different about sustainability investment?
- 17.2 The stock selection process: building a quantifiable concept
 - 17.2.1 Corporate Sustainability Assessment methodology
 - 17.2.2 Corporate Sustainability Assessment criteria
 - 17.2.3 Corporate sustainability evaluation
 - 17.2.4 Corporate Sustainability Monitoring
- 17.3 The index characteristics: a favourable risk-return profile
- 17.4 Conclusion

18. The Green Fund System in the Netherlands

Theo van Belleghem, Ministry of Housing, Spatial Planning and the Environment, Netherlands

- 18.1 The GFS mechanism
- 18.2 Finance company involvement in the environment
- 18.3 The origin of the GFS
- 18.4 The workings of the GFS
 - 18.4.1 Founding a Green Fund
 - 18.4.2 Arrangement of loans and designation of projects
 - 18.4.3 How Green Funds get their money
 - 18.4.4 Auditing in the GFS
- 18.5 The roles of the various stakeholders in the GFS
 - 18.5.1 The public
 - 18.5.2 Financial companies
 - 18.5.3 Government
- 18.6 Types of project
 - 18.6.1 GFS projects abroad
- 18.7 The future of the GFS
- 18.8 Conclusions

Part 4: Environmental Risk and Banks' Products

19. Providers of financial services and environmental risk management: current experience

Andrei D. Barannik, International EA Adviser, USA

- 19.1 Types of environmental and associated risk
- 19.2 Environmental liability
- 19.3 Risk evaluation criteria
 - 19.3.1 Character of environmental risks
 - 19.3.2 Character of a customer
 - 19.3.3 Character of environmental legal framework
- 19.4 Risk evaluation approaches
 - 19.4.1 The standard ERM process
 - 19.4.2 ERM tools
 - 19.4.3 The role of environmental risk manager
- 19.5 Trends
- 19.6 Challenges ahead

20. Environment-induced systematisation of economic risks

Frank Figge, University of Lueneburg, Germany/Bank Pictet & Cie., Switzerland

- 20.1 Risks in investment decisions
- 20.2 Risk characteristics
 - 20.2.1 Differentiation by decision period
 - 20.2.2 Differentiation by interdependencies
 - 20.2.3 Development of a risk matrix
- 20.3 Risk management instruments
- 20.4 Characteristics of environment-induced economic risks
 - 20.4.1 Example: the greenhouse effect climate change
- 20.5 Instruments for managing environment-induced economic risks
 - 20.5.1 Information instruments
 - 20.5.2 Reserve accumulation
- 20.6 Conclusion

21. Estimating the financial effects of companies' environmental performance & exposure

Robert Repetto and Duncan Austin, World Resources Institute, USA

- 21.1 The approach explained
 - 21.1.1 Building environmental scenarios for the US pulp and paper industry
 - 21.1.2 Assessing firm-by-firm exposure to priority environmental issues
 - 21.1.3 Analysing scenario-specific financial impacts
- 21.2 Example: control of nitrogen oxide (NO_x) emissions
 - 21.2.1 Scenarios
 - 21.2.2 Exposures
 - 21.2.3 Financial impacts
- 21.3 Deriving overall financial results
- 21.4 Are these exposures already incorporated into market valuations?
- 21.5 Potential applications
- 21.6 Policy recommendations

22. The Environment Handbook: a Danish tool for including environmental aspects in credit evaluation

Dan Atkins, Deloitte & Touche Environmental Services, Australia, and Charlotte Pedersen, Deloitte & Touche Environmental Services, Denmark

- 22.1 The reason for an environmental handbook for banks
- 22.2 Structure of the handbook
- 22.3 Uses of the handbook

23. Corporate environmental assessment by a bank lender: the reality

Andrea B. Coulson, University of Strathclyde, UK

- 23.1 Lloyds TSB: environmental commitments
 - 23.1.1 Public environmental policy
 - 23.1.2 Endorsing sustainable development
 - 23.1.3 Reporting on commitments
- 23.2 The lending reality
 - 23.2.1 Internal policy and procedural guidance
 - 23.2.2 Expertise in lending contingencies
 - 23.2.3 Policy modelling
 - 23.2.4 Environmental credit risk assessment
- 23.3 Conclusion

Part 5: The Role of Government, NGOs and Multilateral Banks

24. The World Bank's environmental assessment policies: review of institutional development

Andrei D. Barannik, International EA Adviser, USA, and Robert J.A. Goodland, The World Bank, USA

24.1 1970-1984

24.1.1 Policy

24.1.2 Management

24.2 1984-1989

24.2.1 Policy

24.2.2 Management

24.3 1989-1993

24.3.1 Policy

24.3.2 Management

24.4 1993-1998

24.4.1 Policy

24.4.2 Management

24.5 1999-present

24.5.1 Policy

24.5.2 Management

24.6 Findings

24.7 Next steps

24.8 Postscript

25. International financial institutions and the Three Gorges hydroelectric power scheme

Kate Kearins and Greg O'Malley, University of Waikato, New Zealand

25.1 Financing electricity projects in China

25.1.1 The Three Gorges Hydroelectric Power Scheme

25.2 The Export-Import Bank of the United States

25.3 Analysis of the Ex-Im Bank decision

25.3.1 Rethinking risk assessment

25.4 The role of stakeholders

25.5 The precautionary approach to environmental risk

25.6 In the wake of the Ex-Im Bank decision

25.7 Conclusion

26. The Hungarian Environmental Credit Line

Zsolt Pasztor, Deloitte & Touche, Hungary, and Denes Bulkai, European Bank for Reconstruction and Development

26.1 The EBRD

26.2 Central and Eastern European overview

26.3 Creation of the Environmental Credit Line

26.3.1 Background

26.3.2 Budapest Bank

26.3.3 Goals and conditions of the ECL

26.4 Operation of the credit line

26.4.1 Sub-loan approval procedures

- 26.4.2 Environmental appraisals
- 26.5 Appraised projects
- 26.6 Case studies
 - 26.6.1 Case 1. Gas production company: installation of a modern gas production facility
 - 26.6.2 Case 2. Plastic waste processing company: collection and recycling plant
 - 26.6.3 Case 3. Waste-processing plant: construction of iron-containing waste processing plant
- 26.7 Conclusions

27. *The Growth and Environment Scheme: the EU, the financial sector and small and medium-sized enterprises as partners in promoting sustainability*

Marc Leistner, European Investment Fund, Luxembourg

- 27.1 Scope of the scheme
- 27.2 Operation of the scheme
- 27.3 Environmental eligibility
- 27.4 What has been achieved so far
- 27.5 Conclusion

28. *An environmental fund with the WWF label: the importance of appropriate communication tools*

Sabine Doebeli, Zuercher Kantonbank, Switzerland

- 28.1 Environmental research process for Swissca Green Invest
 - 28.1.1 Exclusion criteria
 - 28.1.2 Environmental performance analysis
 - 28.1.3 Social criteria check
- 28.2 Communication tools
 - 28.2.1 Brochures and other information material
 - 28.2.2 Feedback link on the Internet
 - 28.2.3 Environmental reports and questionnaires
 - 28.2.4 Watchlist
 - 28.2.5 Regular meetings with the Advisory Council
- 28.3 Conclusions

29. *The role of the United Nations Environment Programme and the financial services sector*

Mike Kelly, United Nations Environment Programme, Geneva, and Ari Huhtala, United Nations Environment Programme, France

- 29.1 The motivation behind the initiative
- 29.2 The objectives of the UNEP initiatives
- 29.3 UNEP's involvement in cleaner production: a case description
 - 29.3.1 Constraints to CP investments
 - 29.3.2 Possible solutions
 - 29.3.3 UNEP's project
- 29.3 Conclusion

Annexe 1: UNEP Statement by Financial Institutions on the Environment and Sustainable Development

Annexe 2: Signatories to the UNEP Statement by Financial Institutions on the Environment and Sustainable Development

30. Directing investment to cleaner energy technologies: the role of financial institutions

Norbert Wohlgemuth, UNEP Collaborating Centre on Energy and Environment, Denmark

30.1 Why promote CETs?

30.2 Barriers to CETs, and instruments to overcome them

30.3 The 'RET/EE Investment Advisory Service'

30.3.1 Purpose and objective

30.3.2 Activities

30.3.3 Why focus on the finance sector?

30.3.4 Examples

30.4 Conclusions

31. Sustainable finance for sustainable energy: the role of financial intermediaries

Glenn Stuart Hodes, Princeton University, USA

31.1 Financial barriers to the commercialisation of renewable energy

31.1.1 Current trends in development assistance for energy

31.1.2 Market conditions for renewable energy in developing countries

31.1.3 Barriers to implementation

31.1.4 PPAs, government policies and renewable energy enterprises

31.2 Surveying the landscape of development assistance

31.2.1 Philanthropy

31.2.2 Overseas development assistance

31.2.3 Multilateral development banks

31.3 Financial intermediaries: advantages, case studies and future prospects

31.3.1 Comparative advantages of financial intermediaries

31.3.2 Weaknesses and constraints of financial intermediaries

31.4 Conclusion

32. Can financial institutions contribute to sustainability?

Stephen Viederman, Former President, Jessie Smith Noyes Foundation

32.1 Reducing the dissonance between what we value and how we behave

32.2 What does 'sustainability' really mean, and how does it impact on banking and finance?
